

## Sample Report

The following is a sample National Comprehensive Report <sup>SM</sup> DataCheck. The amount and type of records identified in a report will vary from subject to subject. All names and other information are fictional and are for illustrative purposes only. Any resemblance to real persons or public record information is unintentional.

- Social Security numbers are truncated in the examples below. Actual reports may differ from this example.
- Underlined items provide a link to record details at no additional charge.

Some National Comprehensive Reports may locate a partial date of birth.

Frequently, subjects will be linked to other names. The most common reasons for these occurrences are:

1. Typographical errors
2. Jointly filed public records which list both the subject and the second name
3. Father and son who have the same name
4. Fraudulent use of a social security number

Driver License Information is included in report if both the name (first and last) and the date of birth match the subject's information. Common names may generate multiple matches that may or may not be related to the subject.
